

ALPINE PLUS GTW

Paraaldehyde Retanning Agent

Appearance	: Clear liquid
Characteristics	: Cyclic paraaldehyde
Concentration (%)	: 50,0 ± 1,0
pH Value (10 % in water)	: 11,0 - 12,0

PROPERTIES AND APPLICATION:

- Alpine PLUS GTW is used as pre-tanning, tanning and retanning agent for chrome and vegetable tanning.
- With using Alpine PLUS GTW in pretanning or after chrome tanning, fullness and softness of leather increase. It improves penetration of the tanning agents in vegetable tanning and touch on surface.
- When Alpine PLUS GTW used in chrome bath after penetration, increases the absorption of chrome creating simple chrome salts and it is obtained an excellent touch. This system is particularly suitable for bovine leather that is difficult to obtain fullness and writing effect.
- The other advantage of Alpine PLUS GTW compared with conventional retanning agent gives better fullness and softness. Its fixation capacity and light fastness is better than the other aldehydes. It increases dyeing grade. When used in the production of fur-suede, fuller and light leathers are obtained. It does not yellowing on fur.

Recommended usage rates:

Depending on chrome tanning and retanning, by weight of skin 1,0 – 3,0 %

Usually in calf skin in addition to this rate 1,0 – 3,0 % is increased.

STORAGE :

In a cool and dry place in original packaging, can be stored for a period of one year. Product must be protected from excessive heat and cold.

PACKAGING :

120 kg drums.
